

Withdrawal of IRC: SP: 94-2011 “Material Testing Facilities for Highway Sector in NCR”

The Indian Roads Congress had published IRC:SP:94-2011- “Material Testing Facilities for Highway Sector in NCR” in year 2011. This document contains list of laboratories and available testing facilities in NCR.

Recently feedback was received from some user agencies that this document does not convey correct information, as there are frequent changes in NABL accreditation & also cancellation of some testing laboratories from the panel of NABL and as such IRC should withdraw this document as it contains static information only whereas correct updated data in respect of testing laboratories/facilities is available on NABL website. This was also generally agreed in General Specifications & Standards Committee meeting of IRC held on 24.06.2017.

All the user agencies/stakeholders in the Highway Sector are requested to send their comments, if any to IRC latest by 30th September, 2017.
